KOOIMA AG

KOOIMA AG

Helping Friends Farm Better.

Kooima Ag was started when some of John's friends were having difficulties finding parts for their combines. John decided he could help them out by making some of these parts. Kooima Ag started in a 1,200 square foot building. At first, they were only making one part number. Now, we offer over 5,000 part numbers in stock, ready to ship, every day.

Kooima Ag is a manufacturer of cutting components for the ag industry. Our products are – in many cases – better than OEM. The parts fit and function as replacements. We also coat most of our products with the Koyma Klad® process. This is a superior wear coating that adds durability and wear resistance to the parts.

Our robotic technology allows us to work fast and efficiently. Our vacuum furnace gives our parts a superior quality. Kooima Ag was one of the first companies to bring Laser Metal Deposition (LMD) to the ag market. This allows us to make better components, parts, and longer wearing products.

Our in-house metallurgist speaks to the quality and investment we put into our parts. A metallurgist makes sure the steel is right, the heat treating is right, the wear coating is applied correctly for the longest wear, and more.

At Kooima Ag, we have a hard-working team that knows their job well. No one needs to worry about something getting done. Everyone helps out when needed. We all help ship parts, run machines, and answer phone calls. We are a team – always working together and helping each other out. The people are the heart and soul of Kooima Ag.

Scan the code to watch a video to find out more about us and to see our team in action!

At Kooima Ag®, it is important to us that we provide our customers with some of the best parts on the market. In doing this, we feel it is important to have patents. We spend a lot of time and energy developing and manufacturing the techniques used to make them.

Patents also allow our customers to count on Kooima Ag® to offer cutting-edge and innovative parts and products. These products are unique to the marketplace and Kooima Ag®.

Kooima Ag® was awarded our first patent in 1998. Since then, we have been awarded 22 US and 5 foreign patents. We also have more patents pending on many of our latest innovations.

You can count on Kooima Ag® to continue to push the envelope with cutting edge products and processes.

AG TRAILERS

The Kooima Ag® Trailer is a versatile piece of equipment designed primarily for hauling silage and grain, but it can be adapted for various other agricultural applications.

We are currently offering 3 different sizes of ag trailers. All trailers are rear-tipping for unloading.

The adaptability of the Kooima Ag® Trailer makes it a valuable asset for farms and agricultural operations, allowing them to use a single piece of equipment for multiple tasks, saving time and resources.

Potential uses for these trailers:

Silage Transport • Grain Hauling • Manure Stockpiling • Compost Hauling • General Cargo

AG TRAILERS

SILAGE TRANSPORT:

As one of its primary purposes, the trailer can efficiently transport silage from the field to storage or feeding areas. It's designed with features to handle the specific demands of silage transport.

GRAIN HAULING:

The trailer can also be used for transporting harvested grain from the fields to storage facilities or for sale. Its versatility makes it suitable for various grain types.

MANURE STOCKPILING:

The trailer can be used to transport and stockpile manure. This is useful for managing animal waste and fertilizing fields.

COMPOST HAULING:

Compost is valuable in agriculture for enriching soil. This trailer can transport compost from composting sites to fields for soil improvement.

GENERAL CARGO:

These versatile trailers can be used for transporting other agricultural materials or equipment as needed, such as lime or dry fertilizer products.

KOOIMA AG

Features and Advantages of the 14' Trner[®] Composter

At Kooima Ag, our focus is helping friends farm better by creating new products that help in everyday operations. Our high-capacity compost windrow turner, the Trner[®] Composter, has many features and advantages that make it stand out against the competition.

Proudly made in the USA, the Trner[®] Composter has a tough, box design. This heavy-duty design is built to handle tough materials and is proven in harsh conditions! We tested the Trner[®] Composter against competitors and found, in most cases, the Kooima Ag turner was able to process significantly higher tons of raw material.

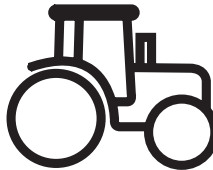

The Trner[®] Composter has a higher clearance making it more suitable for larger piles. The turner's hydraulically driven wheel offers more speed and traction. There is a 3" diameter through shaft on the drum, adding more rigidity and throughput. This drum is designed to throw material back farther with less horsepower. The Trner[®] Composter is road tow-able with a tongue that easily pivots for transportation. Our patented paddle design (Patent #10,617,061; Can. Pat. 3,020,147) helps incorporate more oxygen into the pile. It's easy to service and has the lowest operation cost per ton!

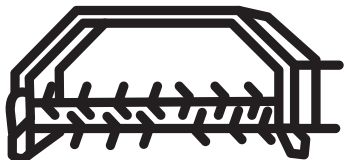

Looking for something smaller? We have that too! Visit our website to find out details about our Skid Trner[®]. Call us or email us to get information about our Compost Turners today! Visit our website for information and videos of the Trner[®] Composter and Skid Trner[®] in action!

Specifications

Benefits of Composting

Cost Efficient

Less material to haul (in most cases over 50% less than raw material).

Better Fertilizer

Compost feeds the soil and improves moisture retention. (Especially useful in sandy soils).

Weed Seed Control

This occurs from the naturally generated heat of the composting process; the high temperature created will destroy weed seeds and kill unwanted pathogens.

Creates More Worm Activity

Composted material creates a more beneficial environment for worm propagation reducing soil compaction.

Easy to Spread

With less moisture composted material is easier to spread and can be done year round.

Less Hauling Restrictions

Composted material is a fertilizer with less restrictions compared to transporting a raw product.

Increased Soil Productivity

Composted material encourages the slow release of nitrogen and lowers the carbon to nitrogen ratio making nitrogen more available to plants.

Larger Harvest

Compost creates more tons/bushels per acre compared to commercial fertilizers.

14 ft Turner®

U.S. Patent #10,617,061 | Canada Patent #3,020,147

DURABLE HEAVY-DUTY CONSTRUCTION

Engineered specifically for manure composting, our compost turner features a tough, heavy-duty design built to withstand harsh conditions and provide reliable performance year after year.

EFFICIENT TURNOUT WITH FASTER GROUND SPEED

Designed to increase your operational efficiency, our compost turner delivers faster ground speed—outperforming competitors in speed and productivity.

ENHANCED RIGIDITY FOR HIGHER THROUGHPUT

The 3" diameter through shaft on the drum adds superior rigidity, ensuring higher throughput and improved durability during operation.

BUILT FOR EASY SERVICEABILITY

Designed with user-friendly serviceability in mind, our compost turner ensures that maintenance is straightforward, keeping downtime to a minimum.

TOUGH BOX FRAME CONSTRUCTION

The sturdy box frame construction of our compost turner is built to handle the toughest conditions, delivering long-lasting durability and performance.

HEADER ADAPTERS

Grind Earlage with **Kooima Ag**[®] header adapters!

John Deere[®] 8000 & 9000 Series Header Adapter

The K8000 adapter is modeled off our proven single paddle design to provide smooth input of material and is ideally suited for 8 row corn heads. This design and feeding angle enable faster product feeding when harvesting. This model will fit both narrow and wide row heads. The PTO connect can be removed in 10 minutes for a better corn head angle as well. Equipped with a standard dual drive, the K8000 adapter powers a variety of corn heads including John Deere[®], New Holland[®], Case IH[®], Drago[™] and more!

REPLACEMENT MIXER KNIVES

MANUFACTURED BY **KOOIMA AG**®

At Kooima Ag, we offer a variety of knives to fit most brands of mixer wagons. Kooima Knives™ are used by both OEM and aftermarket customers. These USA-made knives feature an extra-tough coating for exceptional quality and durability. Choose Kooima Knives™ to save fuel, time, and money!

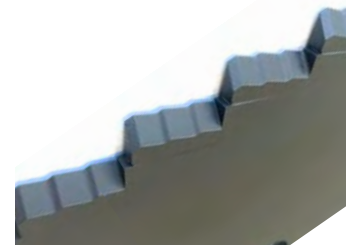

STANDARD EDGE

Constructed from heat-treated high-carbon steel, these knives feature a tungsten carbide cutting edge that ensures lasting sharpness and resilience. They are ideal for routine agricultural tasks and deliver reliable, consistent performance.

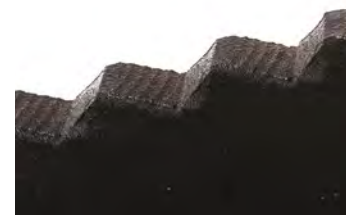

HIGH-PERFORMANCE EDGE

Our exclusive patented design includes a tungsten carbide insert or an extra-thick tungsten carbide coating with a serrated edge. This innovative approach provides unmatched durability and cutting efficiency, making these knives perfect for demanding applications.

SERRATED EDGE

Designed with serrations on each point, these knives offer an aggressive cutting edge that enhances performance in high-speed operations. They are particularly effective for quick, efficient processing.

BALE SLICER KIT

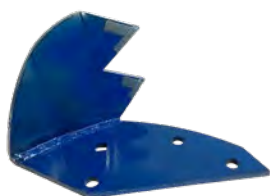

Bale Slicer is a great product for farmers that are wanting to shorten hay particle length within the same amount of mixing time. The bale slicer is installed on top of the knives that are next to the feed restrictor. The placement of the bale slicer is different depending on the brand of wagon you have.

Scan for Bale Slicer Videos

BALE RIPPER

If you put full complete round bales in your mixer wagon, this bale ripper kit results in less time processing the bale. We have seen consistent 15-20 minutes of mixing time shaved off of each bale, as the bale gets brought down into the knives faster. We have also seen less fuel and less wear and tear on your mixer wagon. This is because the heavy bale doesn't sit on your auger.

The bale slicer makes a significant difference in processing time. I run one on the second knife from the bottom, and the top. Having it on top really increases the bale movement in the mixer, and gets it into smaller chunks faster to reach the lower knives. Adding these 2 knives will require extra horsepower, they really put a load on the tractor, which means they're doing their job chopping up the bale.

Kooima Ag® JohnBox - The Tractor Tool Box

Looking for a better way to transport tools and essential items across your operation? Kooima Ag's JohnBox is the solution. This easy-to-install tractor toolbox is accessible and blends in with the front weights of your tractor, making it a practical addition to your equipment. It slides over the weight bracket and secures with a pin, providing ample, dry storage. Keep your tools organized and prevent them from rolling around in your tractor cab or damaging windows. The JohnBox can also be used for collecting rocks and other debris in your field.

" I found that the new Kooima Ag serrated style mixer knives are processing the bales a lot more efficiently. I was able to take about the top four knives out of the mixer to get a few more pounds of feed in, I can fit about 3,000 more pounds of feed in the mixer and have the tractor pull easier than it was beforehand. Curtis mixes feed for his heifer operation with a Supreme™ 1700 series triple screw mixer. He has replaced the original knives with 30 of the Kooima Klad® insert style bolt in blades. These blades cut so good Curtis no longer has to tub grind his hay. "I'm Happy with Kooima's insert knives and will not buy anything else!"

BALE SLICER

Our exclusive Bale Slicer is a great product for farmers that are wanting to shorten hay particle length within the same amount of mixing time. This product is used for cutting livestock rations into smaller particles which helps with feeding. The Bale Slicer will save you time and money now that the bale is broken down faster.

Scan this QR code for more details on the Bale Slicers and a video about installation. Also - See what a Nutrition Consultant has to say!

" I found everything I needed, and was delivered for a fast and speedy replacement to get us in the field faster. Prices were much better than OEM parts and quality is great so far. I will recommend Kooima Ag to anyone needing forage harvester parts. We try to make the best quality feed we can for our Spring and Fall Cow/calf pairs and stocker operation as well as some custom harvesting, and good maintenance and reliable parts sources allow us to do so. " William from West Virginia

Koyma Klad® Silage Plus Processor

This processor offers a new and more efficient way to process your silage, saving fuel and gaining capacity. Here at Kooima Ag®, we've been making knives and shearbars for over 20 years. That same extended life coated technology is applied to the teeth in this disc processor. We haven't seen any measurable wear on processors with over 190,000 tons of silage run through the disc. Conventional processing just isn't good enough anymore! To fit all 6000 series harvesters.

Disc wear after 190,000 tons of silage

Customer Testimonial

"We have used this processor for 2 seasons on our 100 cow dairy plus through our custom work for a 300 cow dairy. Here in Manitoba, our ration consists of 45% alfalfa haylage and balance of corn silage. We have seen a gain in digest-ability in our herd and have been able to increase the length of the cut while still maintaining very good kernel processing. This has increased rumen activity that has resulted in significant increase in production."

/ NARROW KERNEL PROCESSOR /

Kernel processors are counter-rotating rollers that are used to crack corn kernels. Also known as corn crackers, kernel processors are installed between the cutter head and blower.

On this kernel processor, we installed a 4-groove belt system on the right side which helps the belts last longer and run cooler. The belt system will also give you 15% more power. This processor has a 33% differential pulley speed for more kernel cracking. It is also equipped with fiber tech processor rolls with heat-treat and a chrome finish. The processor features a beveled scraper on the bottom roll.

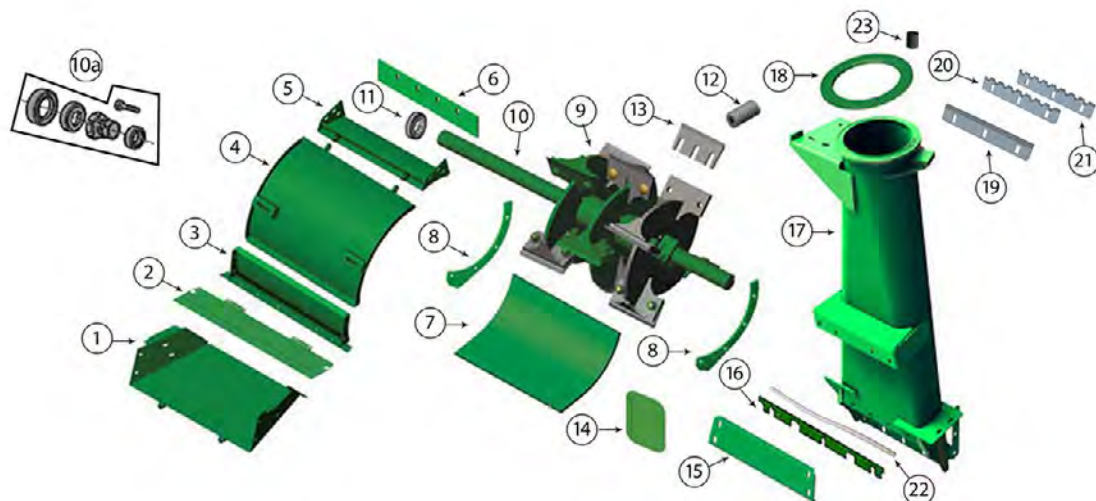

This kernel processor is fully equipped and ready to drop in on your chopper. It is made to fit all John Deere® 7000 narrow series, 7200-7500, 7250-7550, 7180-7580 series choppers.

/ WIDE KERNEL PROCESSOR /

Kernel processors are counter-rotating rollers that are used to crack corn kernels. Also known as corn crackers, kernel processors are installed between the cutter head and blower.

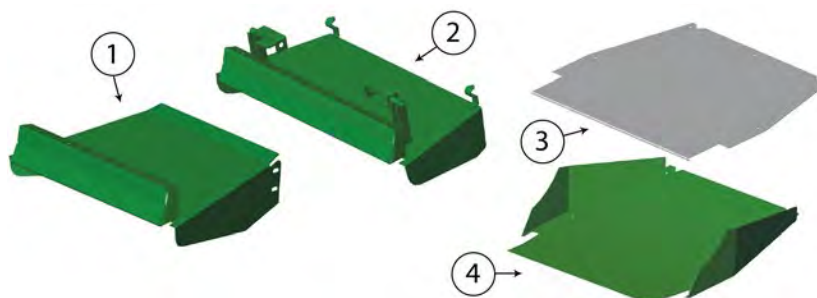

On this kernel processor, we installed a 4-groove belt system on the right side which helps the belts last longer and run cooler. The belt system will also give you 15% more power. This processor has a 33% differential pulley speed for more kernel cracking. It is also equipped with fiber tech processor rolls with heat-treat and a chrome finish. The processor features a beveled scraper on the bottom roll.

This kernel processor is fully equipped and ready to drop in on your chopper. It is made to fit all John Deere® 7000 wide series, 7700-7980 choppers.

/ KERNEL PROCESSOR ROLLS /

SAW TOOTH ROLLS | Designed with a hook shape, it slices and rips material in one action. Rolls are designed to run at different speeds to maximize the hook shape teeth. Easy on your machine with a wider gap between rolls. Rolls are heat treated for tough conditions. Chrome plating is also available for up to three times longer life. Completed and balanced with one piece shaft, these rolls are ready to be installed in your silage cutter!

FIBER TECH CHEVRON ROLLS | Fibertech Chevron rolls provide some of the best processing on the market. Spiral cuts that spin out from the center providing more corners for enhanced processing. Designed to spin at different speeds to increase KP scores. Add chrome plating for up to three times longer life. Heat Treated. Completed and balanced with one piece shaft, these rolls are ready to be installed in your silage cutter!

Kooima Ag® JohnBox - The Tractor Tool Box

Looking for a better way to transport tools and essential items across your operation? Kooima Ag's JohnBox is the solution. This easy-to-install tractor toolbox is accessible and blends in with the front weights of your tractor, making it a practical addition to your equipment. It slides over the weight bracket and secures with a pin, providing ample, dry storage. Keep your tools organized and prevent them from rolling around in your tractor cab or damaging windows. The JohnBox can also be used for collecting rocks and other debris in your field.

Kooima Ag® JohnBox - The Tractor Tool Box

Looking for a better way to transport tools and essential items across your operation? Kooima Ag's JohnBox is the solution. This easy-to-install tractor toolbox is accessible and blends in with the front weights of your tractor, making it a practical addition to your equipment. It slides over the weight bracket and secures with a pin, providing ample, dry storage. Keep your tools organized and prevent them from rolling around in your tractor cab or damaging windows. The JohnBox can also be used for collecting rocks and other debris in your field.

The Rock Stop'er Pro FORAGE HARVESTER STONE DETECTION SYSTEM

Fits many makes and models of self propelled and now pull type forage harvesters. Patented and proven Inertia Sensor senses sudden displacement of front upper feed roll. In-cab sensitivity adjustment enables operator to adjust for varying crop conditions and feed roll speeds. A stone detection will cause the feed drive to stop instantly just like a metal detection.

SENSOR

- Durable cast aluminum
- Moisture resistant sealing
- Strong universal mount, mounts externally in minutes
- Adjust sensitivity in seconds
- Small and light weight.

CONTROL MODULE

- Easily mounts in-cab
- Sensor status indicator
- Audible/ visual detection indicator
- In-cab sensitivity dial

Designed and
Manufactured
in Canada.

/ **KERNEL PROCESSOR ROLLS** /

SAW TOOTH ROLLS | Designed with a hook shape, it slices and rips material in one action. Rolls are designed to run at different speeds to maximize the hook shape teeth. Easy on your machine with a wider gap between rolls. Rolls are heat treated for tough conditions. Chrome plating is also available for up to three times longer life. Completed and balanced with one piece shaft, these rolls are ready to be installed in your silage cutter!

FIBER TECH CHEVRON ROLLS | Fibertech Chevron rolls provide some of the best processing on the market. Spiral cuts that spin out from the center providing more corners for enhanced processing. Designed to spin at different speeds to increase KP scores. Add chrome plating for up to three times longer life. Heat Treated. Completed and balanced with one piece shaft, these rolls are ready to be installed in your silage cutter!

491 491 Standard KP / Corn Cracker Special

Please double check that you do not have the HD version . Rear roll pulley is 3" wide on standard and 4 1/4" on HD. We recommend updating to 491HD drive for Fibertech rolls to get higher differential and better processing.

The K00498 is the latest offering from Kooima Ag, this adapter has an improved crop flow system with the added additional intake roller on the bottom. Coupled with the standard top intake roller, this adapter is uniquely geared for today's higher horsepower harvesters and larger corn heads; offering better clean-out, increased harvesting speed, and less shelling. This adapter works well in dry conditions. [Patents # 8,376,126, & 10,743,467](#)

CROP DIVIDER ASSEMBLIES

Kemper™ style Crop Dividers to fit Claas® RU 600 and New Holland® RI 600 series corn heads

The RU and RI heads are great, but have a tendency to double cut the stalk, leaving a trail of 6-8 inch long chunks lying in the field. This new Crop Divider holds the stalk up and in tighter to the drum for a single clean cut with no waste. Your customers will notice the difference and so will you! We ran them on our RU head and loved them. Call today for more details.

The K00498 is the latest offering from Kooima Ag, this adapter has an improved crop flow system with the added additional intake roller on the bottom. Coupled with the standard top intake roller, this adapter is uniquely geared for today's higher horsepower harvesters and larger corn heads; offering better clean-out, increased harvesting speed, and less shelling. This adapter works well in dry conditions. [Patents # 8,376,126, & 10,743,467](#)

KOOIMA AG® REPLACEMENT PARTS TO REPLACE NEW HOLLAND® RI SERIES ROTARY HEADS

Replacement parts produced by Kooima Ag® to fit New Holland®

Kemper™ style Crop Dividers to fit New Holland® RI 600 series corn heads

The RI heads are great, but have a tendency to double cut the stalk, leaving a trail of 6-8 inch long chunks lying in the field. This new Crop Divider holds the stalk up and in tighter to the drum for a single clean cut with no waste. Our customers notice the difference and so will you! We ran them on our RI head and loved them. Call today for more details.

The KFR920 is the latest offering from Kooima Ag, this adapter has an improved crop flow intake system with the additional intake roller on the bottom. Coupled with the standard top intake roller, this adapter is uniquely geared for today's higher horsepower harvesters and larger corn heads. This header adapter provides better clean-out and increased harvesting speed. This new design will help stop the bubbling of corn in front of the feed rolls.

Kooima Ag® JohnBox - The Tractor Tool Box

Looking for a better way to transport tools and essential items across your operation? Kooima Ag's JohnBox is the solution. This easy-to-install tractor toolbox is accessible and blends in with the front weights of your tractor, making it a practical addition to your equipment. It slides over the weight bracket and secures with a pin, providing ample, dry storage. Keep your tools organized and prevent them from rolling around in your tractor cab or damaging windows. The JohnBox can also be used for collecting rocks and other debris in your field.

" I found everything I needed, and was delivered for a fast and speedy replacement to get us in the field faster. Prices were much better than OEM parts and quality is great so far. I will recommend Kooima Ag to anyone needing forage harvester parts. We try to make the best quality feed we can for our Spring and Fall Cow/calf pairs and stocker operation as well as some custom harvesting, and good maintenance and reliable parts sources allow us to do so. Kooima Ag® JohnBox - The Tractor Tool Box

Looking for a better way to transport tools and essential items across your operation? Kooima Ag's JohnBox is the solution. This easy-to-install tractor toolbox is accessible and blends in with the front weights of your tractor, making it a practical addition to your equipment. It slides over the weight bracket and secures with a pin, providing ample, dry storage. Keep your tools organized and prevent them from rolling around in your tractor cab or damaging windows. The JohnBox can also be used for collecting rocks and other debris in your field.

Kooima Ag® JohnBox - The Tractor Tool Box

Looking for a better way to transport tools and essential items across your operation? Kooima Ag's JohnBox is the solution. This easy-to-install tractor toolbox is accessible and blends in with the front weights of your tractor, making it a practical addition to your equipment. It slides over the weight bracket and secures with a pin, providing ample, dry storage. Keep your tools organized and prevent them from rolling around in your tractor cab or damaging windows. The JohnBox can also be used for collecting rocks and other debris in your field.

Order # K10151

95 lbs.

\$975⁰⁰ ea.

NEW

Install on the front weight rack of the tractor.

Kooima Ag® JohnBox - The Tractor Tool Box

Looking for a better way to transport tools and essential items across your operation? Kooima Ag's JohnBox is the solution. This easy-to-install tractor toolbox is accessible and blends in with the front weights of your tractor, making it a practical addition to your equipment. It slides over the weight bracket and secures with a pin, providing ample, dry storage. Keep your tools organized and prevent them from rolling around in your tractor cab or damaging windows. The JohnBox can also be used for collecting rocks and other debris in your field.

RETURN PROCEDURE: Return new or unused products to Kooima Ag® within one year of delivery. Damaged or defective products must be returned within 30 days for a refund or exchange; please keep all packing materials for inspection. Before returning parts, you must contact our sales department to acquire a Return Goods Authorization (RGA) number and shipping instructions. The RGA Number must be clearly marked on the outside of the package, with a Kooima Ag® packing list or invoice included. Return parts will be subject to a 15% restocking charge. Proper credit (for the cost of product only) will be issued to the original form of payment after the product has been received, or an exchange will be sent promptly if requested. Returns must be purchased from Kooima Ag® and in marketable condition (excluding warranty returns). Unfortunately we cannot accept packages sent freight collect or COD.
